On a positive note, we are very excited that Walgreens will be on site to administer the first round of the COVID-19 vaccine next Friday, January 15th. Since the vaccine will not achieve its full effectiveness until 7 days after the second round of the vaccine, we cannot let our guard down at a time that we are so close to being able to protect our residents with a vaccine. As we've mentioned in recent communications, we are cautiously optimistic that we are finally seeing the light at the end of the tunnel.
